CREAM TAPE

BY 3M. Cream pressure sensitive self adhesive single sided tape approx 25mm (1") wide.

Application: Budget price tape for fixing non-valuable photos or pictures into mounts. This is not any old masking tape! This pressure sensitive tape does not fall off like masking tapes do. Do not use as masking tape!

Can be used as a budget frame sealing tape where appearance is not a priority, forms an effective dust seal. Not Recommended for valuable items.

PH7-70

Choice of many professional framers. As the name implies a pH-Neutral paper tape with an acid free adhesive. Single sided self adhesive, supplied in individual boxed rolls.

66 metre roll in a box. Uses include hinging artwork, fitting artwork into mounts, sealing frames, lining frame rebates etc. The tape is self adhesive, and once on it stays on. White, single sided acid-free (pH 7 neutral) self adhesive paper tape. Coated with an acid free, water based acrylic adhesive system, non-ageing and will not turn yellow. Can also be used as a quality frame seal.

ARTISTS TAPE AT25

A thicker alternative to Ph7-70 tape. This comes un-boxed, individually shrink-wrapped 55 metre rolls. Uses are the same as PH770 and include hinging artwork, fitting artwork into mounts, sealing frames, book repair lining frame rebates etc. Ideal for larger/heavier artwork.

ECO Frame Seal Tapes

General purpose self adhesive tapes for sealing the backs of frames (dust seal). Self adhesive and will stick well to polymer frames and "aqua" type conservation backing boards as well as traditional boards, hardboard, MDF, art-bak etc.

Available in 38mm and 50mm widths – that's 1.5 and 2 inches. (75mm/ 3 inch tape also in stock p.o.a.)

Makes an effective dust seal. A good alternative to traditional gummed paper sealing tape. Not recommended for using to fit artwork into mounts.

Please note, this is not the cheaper, thinner "eco" tapes offered elsewhere. This is the same tape we use ourselves in our frame workshops.

DOUBLE SIDED TAPES:

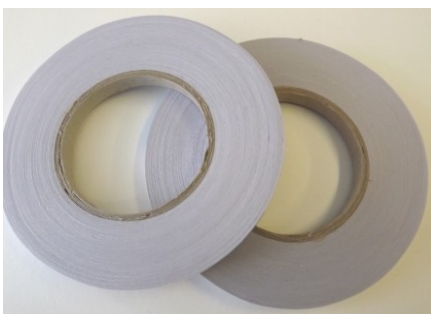

STIX2 Tape Runners

Stix2 tape runner is a double sided tape dispenser in a handy pocket size. Each one contains 12 metres (39 feet) of 6mm wide double sided tape that can be applied in any length from the stix2 "pen" dispenser.

Uses include photo mounting fixing the backs onto mounts, fixing multi layer mounts, plus scrapbooking, crafts etc where a narrow double sided tape is required.

"Fingerlift" Tape

Trade Favourite! No dispenser gun required. Good quality 50 metres on a roll. No box, no fancy packaging. 12 mm (half an inch) wide. Simply tear off to any length required and apply to one surface. When you are ready to join two surface together just peel off the "fingerlift" backing paper and press the two surface together. Main use: Photo mounting, fixing mount backs, fixing double mount layers.
